

Government of Canada Program for International Polar Year 2007-2008

NOTICE OF AMENDMENT TO CALL FOR PROPOSALS

Deadline

In recognition of the need for further consultations to facilitate northern involvement in the science and research projects for **the International Polar Year (IPY)**, the **application deadline for science and research proposals under the Government of Canada Program will be extended until March 31, 2006.**

We appreciate the efforts that many individuals and organizations have made to meet the original deadline. The IPY Federal Program Office would be pleased to receive complete applications in advance of the extended deadline so that processing of the applications can begin.

A subsequent Call for Proposals for science and research projects will be issued following a review of the submissions and identification of gaps in relation to the IPY Program priorities as outlined in the Call for Proposals issued December 19, 2005.

Page Limit

In recognition of the broad scope and scale of activities under IPY, the 10-page limit for the free form description of the proposed research projects (section 20) will be amended as follows:

The 10-page limit will continue to apply to proposals that involve **up to 10 applicants and co-applicants** who are seeking funding (not including Post Doctoral Fellows, technicians, clerks, administrative assistants, or collaborators).

Three pages may be added for proposals that involve **11-15 applicants and co-applicants**, for a total of 13 pages.

A further 3 pages may be added for proposals that involve **more than 15 applicants and co-applicants**, for a total of 16 pages.

ALL OTHER INSTRUCTIONS FOR APPLYING REMAIN THE SAME AS IN THE ORIGINAL CALL FOR PROPOSALS.
